Evening Brief

Date: Saturday August 18th, 2018

Weather Summary

***** Winds Increase again Monday for ID/UT/NV *****

Sunny skies, warming temperatures and light winds return briefly on Sunday as the ridge begins to build back into the Great Basin. Zephyr winds may increase starting Sunday along the Sierra Front, but stronger winds may occur Monday and toward mid-week.

Gusty southwest winds may pick up over more of Nevada/Idaho into Utah by Monday as another trough moves into the Northwest.

Moisture is pulled north in advance of trough on Monday with thunderstorms returning to northeast NV/Nrn Utah/Idaho/Wyoming. These thunderstorms may be a mix of wet/dry and will be monitored for potential high risk. Otherwise, wetter thunderstorms return to southern Nevada, the AZ Strip and Utah Tuesday through much of next week, with drier air and periods of breezy winds across much of Idaho and the western half of Nevada.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Moderate Attack Activity
National	5	GB New Fires and Acres: 33 fires 3,259.5 acres; 28,330 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

A Fuel/Fire Behavior advisory has been issued for North/West Nevada into Idaho and Northwest Utah. This advisory can be found here: <https://gacc.nifc.gov/gbcc/fuels.php>

Widespread areas of critically dry fuels continue across the northern half of the Geographic Area. ERC's are mainly in the 90th to above the 97th percentile across Northern parts of NV, northern half of UT and ID/WY, where most areas are near or just above record highs for the time of year

Sagebrush Live Fuel Moisture levels across most areas are near or above early August normals, and grasses are cured in all areas, even up to 7500 ft in Idaho and Wyoming. ERC's have risen above the 50th percentile across most of the southern third of Nevada, Utah, into the AZ Strip, with some stations in the 70th-80th percentile in southern/southeast Utah, which is near record levels for this time of year in those southern areas. However, increasing moisture over the next few days across southern areas should knock fuels down considerably

Resources:

Aviation within the Great Basin

- 1 VLAT's, 5 LATs, 2 CL-415
- 21 SEATs, 2 Fire Bosses
- 9 Type 1 Helicopters / 9 Committed
- 8 Type 2 Helicopters / 6 Committed
- 20 Type 3 Helicopters

Crews Committed within the Great Basin

- 11 IHCs Committed / 0 Available
- 27 T-2 IAs Committed / 0 Available
